ALKOM

AUTOCISTERNE

**When design
meets the road,
the hard work
becomes
a daily pleasure.**

*Harmony of the lines, simplicity of use,
attention to details, make Alkom tanker
an ideal travelling companion to work.*

ALKOM SC43 - semitrailer

In medio stat virtus

The perfect solution
to transport fuels from refinery to station

Benzene-resistant
paint coating

Inox pipes designed
for increase load
and unload speed

Drawer for system
with translating wing

Top security when
unhook loaded vehicle

Lowered center
of gravity

Reduced tare

ALKOM SC - semitrailers

More options available

ALKOM SC26

ALKOM SC32

ALKOM SC37

ALKOM SC45

Multi product meter (gravity) with electronic register

Diesel fuel meter (pump) and multi product (gravity) with pipe

Double multi product meter (gravity) with electronic register to unload at the same time

Diesel fuel meter (pump) with pipe

Double meter: the first to unload gasolines (gravity), the second to unload diesel (gravity or pump) with pipe on the other side

ALKOM SC42 - pressurized semitrailer

The safest way to transport

On the ship or on the road,
the future of safe transport

Boat hangers
RINA tested
(optional)

Trailer landing legs available
in pneumatic option

Inerting system
(optional)

L2BH vehicle

L4BH vehicle

Ready to maritime
transport

ALKOM SB35X - pressurized inox semitrailer

Six products in the same tank

Insulated or not, it can transport at the same time:
water, chemical products or waste (hot and cold), fuels, bitumen

From refinery...

ALKOM BC21 - central axis trailer

A great trailer for a total profit

It carries 1000 liters more of product and reduces management costs

Swivel joint with pipe to connect the tank truck

Mono or multi product meter with electronic or mechanic register

ALMA meter (gravity)

Reduced tare: 3.200 Kg

Less wear = less costs

Better maneuverability

ALKOM RC21 - trailer

A good tradition

Effective transport and simple running

Reduced tare: 3.900 Kg

Double wheels

Second compartment available option

ALKOM RC15 - trailer

A 15.000 liters trailer with single wheels to use with 4 axis tank truck

REPSOL

Diesel 8.88⁹
Super 95 8.88⁹

13000

...to gas station...

Installation on two axis truck

Go everywhere without concerns

Transport your product in every destination,
even the most inaccessible and far

Hood to protect
meter system (optional)

Bilateral exit pipe

Space saving accessory
storages

Transport capacity:
from 3.000 to 15.000 litres

Shapes available

Reduced distance between
tank and cabin

Double meter
available

Installation on three axis truck

Three axis for every needs

The best compromise:
alone or with our trailers

Front sling to remove frame
negative twistings

Saddle support to help
the sling work

Fast connection to trailer
with driplless system

Transport capacity:
from 17.000 to 23.000 litres

Shapes
available

Aerodynamic shape

Double meter
available

Installation on four axis truck

Transport capacity:
from 24.000 to 29.000 litres

Double meter
available

Combinable with
Alkom RC15 trailer

Axes high

An extraordinary capacity
for great needs

Diesel fuel meter (pump) with pipe between tank and cabin

Diesel fuel meter (pump) with pipe on the side

Mono product meter (gravity) with mechanic register

Multi product meter (gravity) with electronic register

Multi product ALMA turbine (gravity)

Diesel fuel meter (pump) with pipe between tank and cabin with electronic register
